LAMY – Companions for a lifetime

At Lamy, premium is not a question of price – it is a holistic quality standard. Whichever product you choose from our extensive range, we supply the best quality made in Germany.

The timeless modern aesthetic of the Lamy design combined with the highest quality has always guaranteed the most effective form of sustainability: our writing instruments are not disposable products. They accompany people over the years and decades of their lives – just like the communication message on the individualised writing instrument of your choice.

Find out more about sustainability in the Company section on lamy.com.

Taking responsibility – shaping the future

Practising responsibility

Sustainability stands for constant values, timeless ideas, continual benefits and long-lasting products. At Lamy this is not only a promise, sustainable practices are a matter of course. They form the basic principles of the company philosophy which we have practiced at Lamy from the very beginning – for the good of the environment and society, for people and products.

The timelessly modern aesthetics of the Lamy design in connection with highest levels of quality has always guaranteed the most effective form of sustainability: lasting enjoyment of our products and thus their long-term usage. The liberation from fashionable embellishment as well as the commitment to using only those details which serve a specific function ensure: Lamy writing instruments are not disposable products. They accompany people throughout the years and decades of their lives.

Two columns of sustainability

At Lamy, we understand sustainability to be a continuous process and a clear obligation to the constant further development of the company and the brand – on economic, ecological and social foundations.

In this way, we safeguard economic efficiency under ecologically justifiable manufacturing conditions. Simultaneously we put socially supportive and equitable activities at the centre of all company activities.

Economic and ecological responsibility

Physical as well as visual development and manufacturing of classic products with exceptionally long lifespans – that is our company focus.

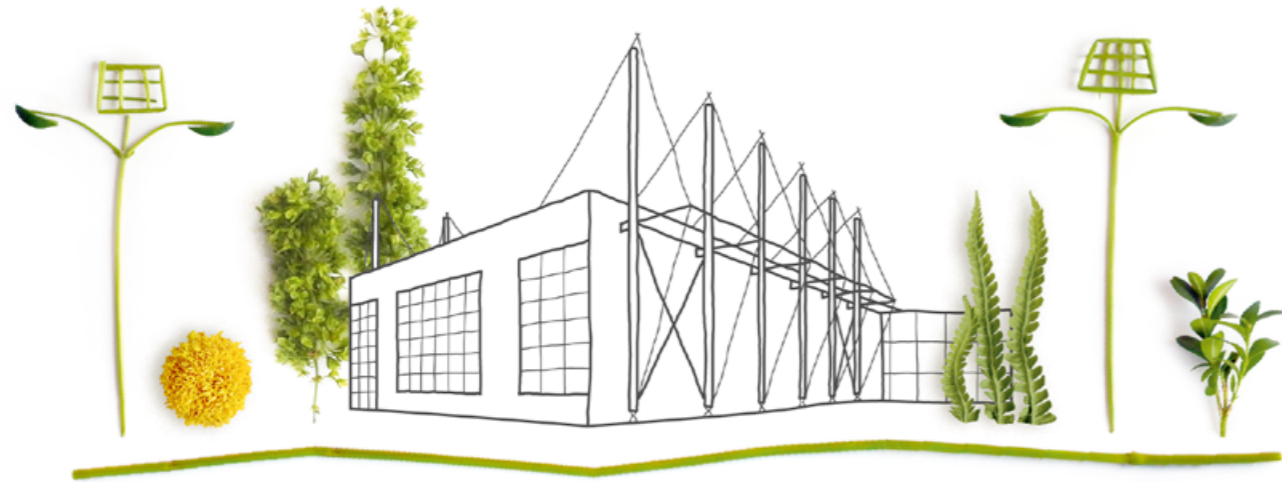

Here, the standards for future-oriented action are set by resource-friendly and energy-efficient manufacturing with short supply chains for ecologically sustainable business.

Social responsibility

In addition to focusing on the qualitative growth of the company and treating employees and partners with respect, Lamy is committed to preserving and promoting handwriting as an important cultural asset.

With our thinking tools, tools for writing, drawing and painting, we inspire people all over the world to further develop their intellectual, creative and communicative abilities.

Economically efficient, ecologically sound.

Quality. Made in Germany.

- High-precision manufacturing + highest level quality materials
- Best processing quality
- Exceptionally long lifespan
- Proven quality management according to DIN ISO 9001:2015
- Majority of work with German suppliers
- Repair service

Design.

- Timeless, not trendy or decorative
- Longest possible physical and visual longevity

Product development.

- Mindful use of resources
- Regular evaluation of applicability of recycled materials

Product manufacturing.

- Production, research and development: all in one place
- More than 95% of in-house production at sole site in Heidelberg
- Long-term investments in in-house manufacturing
- Shortest possible delivery routes via regional suppliers
- In-house recycling

Product marketing.

- Packaging contains no adhesives and uses a large amount of recycled paper
- All displays for product presentation are *Made in Germany*
- Printed material is certified and made in collaboration with regional suppliers

Product delivery.

- Environmentally friendly packaging
- Cardboard filling material made from recyclable paper

Energy consumption.

- Use of renewable energy sources (100% green electricity)
- CO₂ analysis to assess saving potentials
- Use of electrical injection moulding equipment
- Use of heat generated by production processes

Biodiversity.

- Roof greening and sculpture garden
- Beehives on company premises

Generated waste material.

- Sorted recycling

Socially supportive and equitable.

Employees.

- Secure jobs and minimal employee turnover
- Job tickets
- Employee discount for the Lamy products (employee flea market)
- Training in employee's own training workshop
- Employee's own canteen: 'Lamyteria'
- Training leave programme
- Health programme: physical wellness activities offered during breaks, e-Bike promotion

Partnerships.

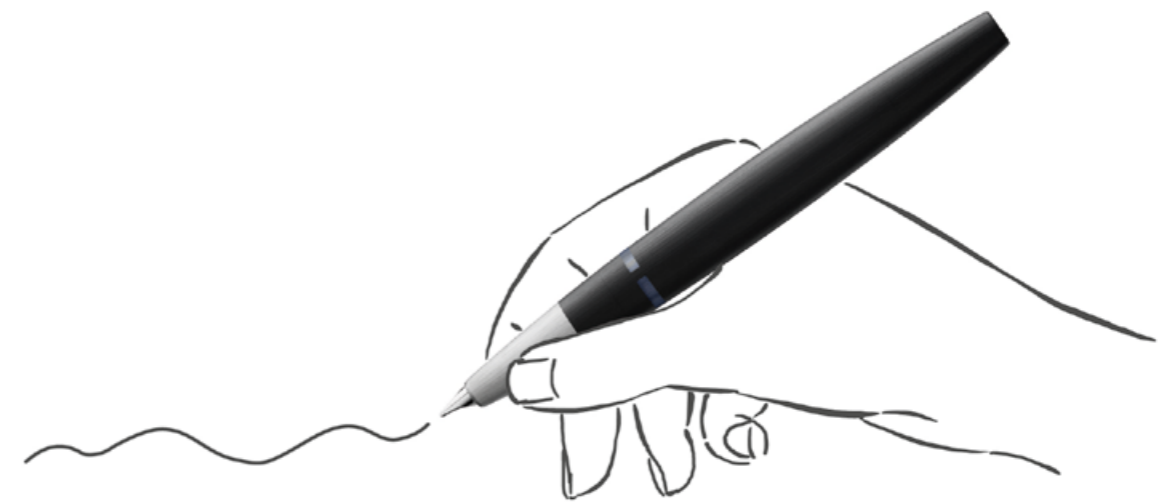

- Cultivation of long-standing partnerships with customers and suppliers
- Allocation of assembly work to sheltered workshops
- Loyalty to specialist shops

Society.

- Instructional material and interactive activities for schools
- Promotion of the learning and maintaining of handwriting

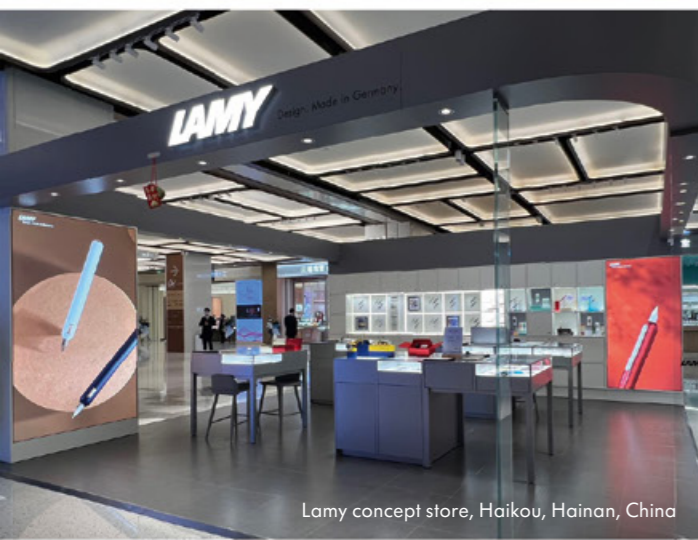

Company culture.

- Independent German medium-sized family company
- Clear long-term commitment to company headquarters and manufacturing site in Heidelberg
- Proactive onboarding
- Improvement suggestions by employees
- Focus on stable growth

From Heidelberg into the world

Around the world the LAMY brand stands for high-quality designer writing instruments with a timelessly modern aesthetic and perfect functionality. As an independent family company, since its foundation in 1930 Lamy has been firmly committed to Heidelberg as the company base, guaranteeing consistently premium quality „Made in Germany“.

With an annual production of over 8 million writing instruments, Lamy is today not only the market leader in Germany, it has also developed to become a sought-after brand around the world. Lamy generates a good half of its turnover abroad. The brand

is now represented in more than 80 countries with over 15,600 sales outlets worldwide, including around 200 mono-brand stores.

Alongside all this, the company – not least through the release of a Special Edition each year – is constantly setting new trends and inspiring handwriting fans around the world with innovative colours and surfaces. This is how Lamy is able to continuously reinvent itself and prove that a writing tool is more than an object of utility: it is a genuine lifestyle accessory which lends expression to the joy of writing by hand and underlines the individuality of its owner.

Design worth hunting out: functional, robust and recognisable.

Robust writing instruments with an emphasis on functionality. Made from tough ASA plastic – transparent or in attractive colours. With a striking, spring-operated metal clip.

Simply modern – a totally new quality for communicating your brand.

The seamless deep-drawn aluminium bodies of these writing instruments lend the series a uniquely harmonious appearance. Brushed and blasted surfaces create details of formal tension which are refined by a black silk-matt anodised coating. The impressive, high-gloss clip perfectly complements the overall concept.

Design: Jasper Morrison

Refinement types

Lamy's notebooks can be individually refined in many ways. The various refinement types and surfaces can be individually combined.

Embossing

Blind Embossing

- deep embossing of a motif, tactile
- available versions: tone-on-tone or darkening embossing

Foil Embossing

- deep embossing of a motif, tactile
- strong contrast: colour foil embossing
- also available as eco-sustainable upcycling product made from biodegradable Crush Paper (FSC® certified)

Printing

Digital Printing: Standard Cover

- ideal for sophisticated motifs
- colour gradients and multi-coloured photo printing possible
- borderless printing possible
- customised name printing with selectable font possible (depending on material/quantity)

Digital Printing: Crush Paper

- ecological, sustainable upcycling product
- made from up to 30 % vegetable waste from the agro-industry
- FSC® certified
- fully recyclable and biodegradable

Offset Printing: glossy and matt paper

- paper cover
- matt picture paper
- glossy or matt protective cover

Offset Printing: Belly Band

- high brilliance of colour via offset printing method
- double-sided possible
- often in combination with discreet promotional print on inside cover

Offset Printing: Advertising Pages

- long-lasting effect
- high colour brilliance thanks to offset printing

Offset Printing: Card Insert

- long-lasting effect, as card insert is often used as a bookmark
- ideal for items that should have less of a promotional feel
- high colour brilliance thanks to offset printing
- double-sided possible

Do you have questions about individual refinement options? Please contact us. We will be happy to make you a customised offer.

Edge Finishings

Digital Edge Printing

- ideal for logos, letterings or patterns

Edge Finishing: 'Cesello'

- 3D engraving on book block
- engraving is filled with colour

Edge Finishing: coloured foils

- matt and shiny foil
- metal foil available

Coloured Spray Edge Printing

- available in over 50 colours
- edge finishing with water-based inks

Applications

Elastic Band and Pen Loop

- available in over 50 colours

Coloured Ribbons

- woven ribbons
- available in over 50 colours

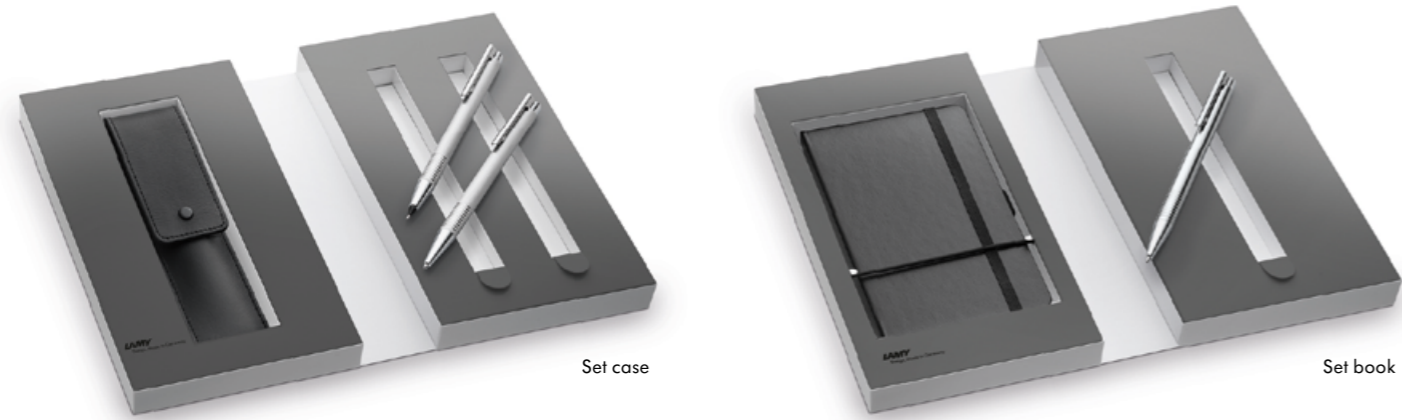

Gel Doming: standard or customized

- stickers made of synthetic resin
- ideal for three-dimensional advertising messages on plain surfaces
- available in many standard shapes/sizes
- shapes freely selectable (depending on quantity)

Show how full service really works – with a Lamy set.

advertising insert	optional set insert, digital print up to 4 colours according to customer specifications	

The better the packaging the more fun it is to open.

Stylishly packaged writing instruments make high-quality, sophisticated gifts. Perfect for strengthening business relationships, as tokens of appreciation or as incentives.

Optional packaging	Model number
carton box (one or two writing instruments)	V 60
carton tube (not suitable for surface „brushed“)	V 52
carton box (one or two writing instruments)	E 119
metal case	E 180
carton box	E 188

Symbiotic perfection in form.

Designed by EOOS, the extraordinary LAMY ideos offers its users a unique haptic writing experience. This writing instrument combines the basic forms of triangle and circle to create a stylised teardrop shape. The robust brass housings are refined with a high-quality palladium finish.

Design: EOOS, Vienna

Inspired by Bauhaus and a firm favourite with companies.

This model is available as a piston-fill fountain pen with a hand-polished, rhodium plated 14-carat gold nib, a rollerball pen, a ballpoint pen or a mechanical pencil. Made from fibreglass-reinforced polycarbonate and matt stainless steel with a lengthwise grain. Spring-mounted steel clip. Ballpoint pens made from exclusive types of wood with a spring-mounted stainless steel clip and palladium-finished hardware.

Design: Gerd A. Müller
